## Education

---

### Kurukshetra University

Aug. 2018 – July 2022

Bachelor of Technology in Computer Science Engineering(7.5-CGPA)

## Experience

---

### Sopra Steria India

Aug 2022 – Present

Software Engineer

Noida, India

- Developed critical functionalities for Airbus Transport International (ATI) using C#, ASP.NET, jQuery, and SQL, consistently achieving **100%** accuracy.
- Resolved complex bugs and defects, leading to the early delivery of releases and a **10%** improvement in app performance.
- Played a key role in building a Visitor Management System (VMS) using **React**, which was live for **700+** employees.
- Implemented features to manage visitor records and approval requests, maintaining **100%** security compliance.
- Independently managed project TouchNGo - Interacted directly with clients to deliver **6+** smooth package developments
- Interacted with clients and handled **21+** incidents, boosting client satisfaction and improving resolution time by **20%**.
- Experienced in working with fast-paced working environment, handling over **9** user stories in a less than a quarter.
- Demonstrated **Leadership** by undertaking complete transition and handover of the TouchNGo to **Airbus** Tech Team,
- Solved critical production issues, resulting in a **~10%** improvement in the application performance.
- Set up Jenkins for continuous integration to automate the entire process—loading the latest code, running tests, and generating a daily report.

### ForceBolt

Jan 2022 – Feb 2022

Full Stack Developer Intern

Mohali, India

- Developed the complete UI for the Inbox section of the Crux project using HTML5, CSS, and JavaScript during internship.
- Learned Node.js, Javascript, and solved Data Structures & Algorithmic problems to enhance analytical and logic-building skills.

## Projects

---

### Contractual Lists Integrated Platform - CLIP / React, .NET

Jan 2024 – Present

- Built responsive and optimized user interfaces, leveraged React hooks, ensuring a smooth and efficient user experience.
- Enhanced performance by implementing lazy loading and React.memo, leading to a **15%** reduction in loading times.

### Airbus Transport International / jQuery, SQL

July 2023 – Dec 2024

- Optimized data retrieval processes with **C#, SQL**, and **Kendo UI**, achieving decent speed in query execution times.
- Developed user stories and implemented anti-forgery tokens, effectively mitigating Cross-Site Scripting (XSS) vulnerabilities and enhancing security against forgery and injection attacks.

### Visitor Management System / React, .NET

Feb 2023 – June 2023

- Made a significant contribution to development of a robust and scalable VMS for the Aerospace Department.
- Designed and optimized responsive HMIs using React components to enhance user experience across multiple devices.

## Technical Skills

---

**Languages:** JavaScript, C#, HTML, CSS, SQL

**Technologies/Frameworks:** GitHub, React, Jenkins, ASP.NET

**Developer Tools:** Visual Studio Code

## Leadership / Extracurricular

---

- Successfully led the transition and handover of the TNG Project receiving **A+** feedback from Airbus stakeholders.
- Frequent Interactions with German and France Clients for refinement of the User Stories.
- Solved **250+** problems on LeetCode
- Personal Portfolio - <https://mudit-arora.netlify.app/>
